

# DESIGN &

# MANUFACTURING

## For Aircraft Interiors

### DESIGN

Product development, design, certification support, prototyping - all with expertise in EASA Part 21J requirements.

### MANUFACTURING

Design for manufacturing, pre-production analysis, wide scope of manufacturing capabilities - all with EASA Part 21G (LT.21G.0005) certification.

### OUR SERVICES

Turnkey development solutions, design and manufacture

Flexible design and production, no order too big or small

Rapid project estimation and delivery times

### WHY CHOOSE US?

Design and manufacturing under one roof, hassle free.

### CONTACT US

Biruliškės, LT-54469, Lithuania

## CAPABILITIES

### PROTOTYPING

3d printed, silicone molded, milled, bonded prototypes

### SHEET METAL COMPONENTS

Various sheet metal foldings and plates

### FINISHING

Sanding, painting, polishing.

### COMPOSITE PANEL STRUCTURES

Composite panel structures, bonded assemblies

### MILLED COMPONENTS

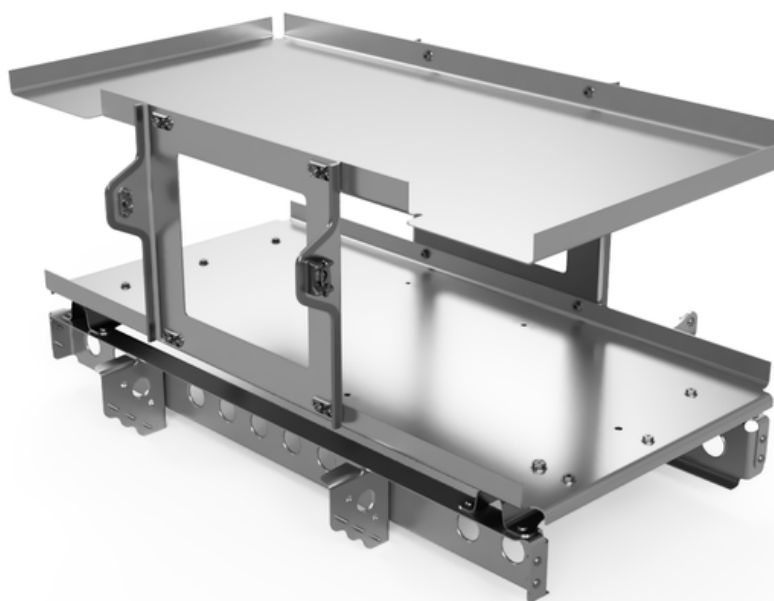

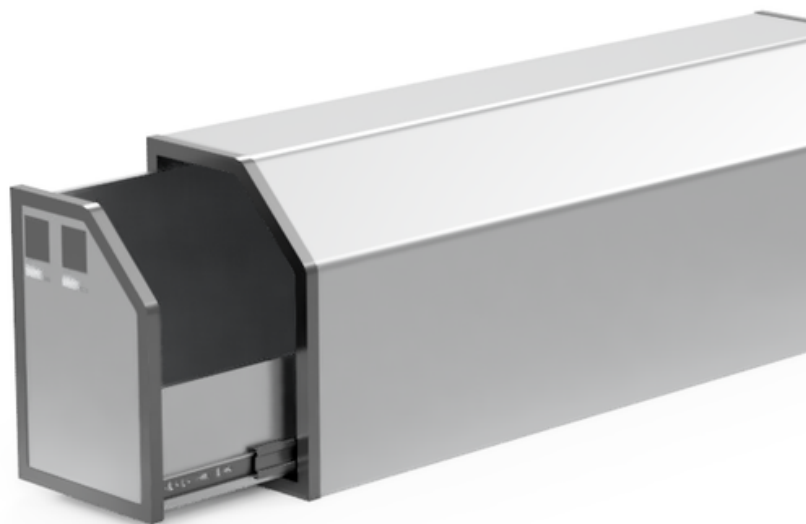

CNC milled components

### ASSEMBLY & KITTING

Riveting, bonding and others

## KEY COMPONENTS

Stowages, partitions, dividers, plates, brackets

## ALWAYS FACING **FORWARD**

Founded in 2021, SKYCO is a multifaceted aircraft interiors manufacturing company with desire to address the ultimate problem of disconnect between design and production processes.

We solve this problem by having a team of aviation engineering professionals with diverse backgrounds, working collaboratively to design solutions that are both cost and time efficient to manufacture.

SKYCO is located minutes away from Kaunas Airport, boasting a fully equipped workshop spanning 600 m<sup>2</sup>, ready with state-of-the-art manufacturing machinery.
