

DESIGN/MANUFACTURING FOR AVIATION

Company Profile

Seamless design and manufacturing solutions for aircraft interior, with reliability and transparency

WHO WE ARE

More than manufacturing

ABOUT US

Launched in 2021, SKYCO is a family-run EASA Part 21G production organisation designing and manufacturing aircraft interior components.

WHAT WE DELIVER

01

From design through certification support to manufacturing, we help move cabin interior projects from concept to delivery, with clear communication, full visibility of progress and responsive support at every step.

HOW WE SUPPORT YOU

02

We provide the engineering and manufacturing capacity to help engineering companies, airlines, MROs and OEMs turn interior requirements into engineered, certified and delivered solutions.

WHAT WE DO

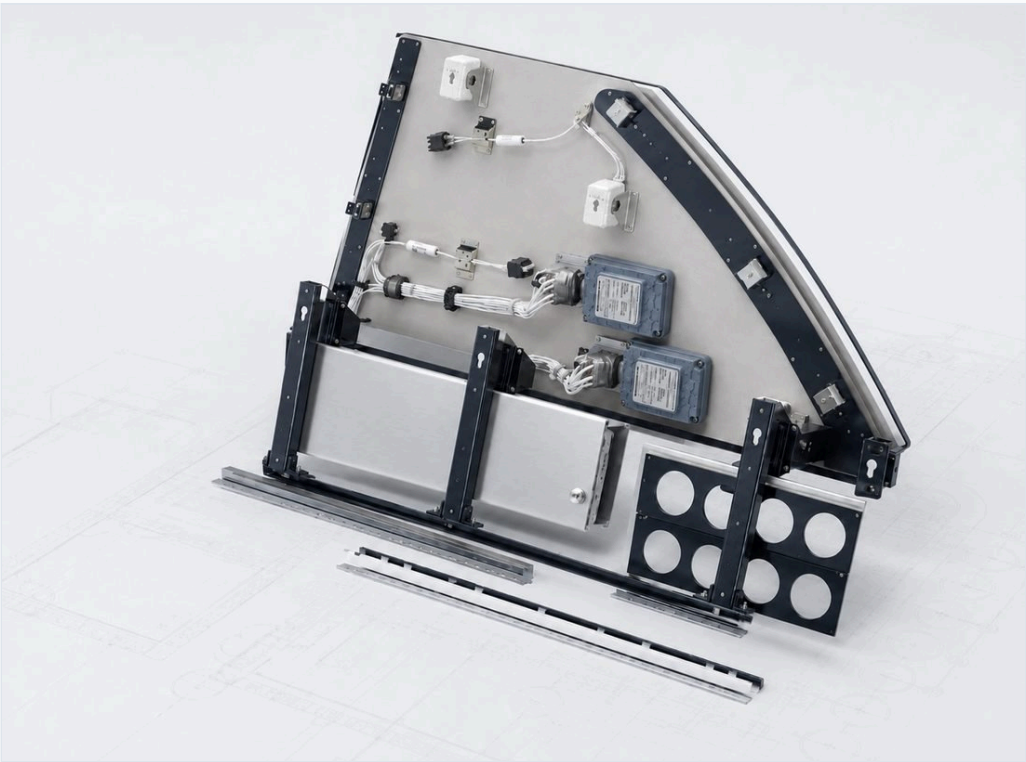

Experience and expertise

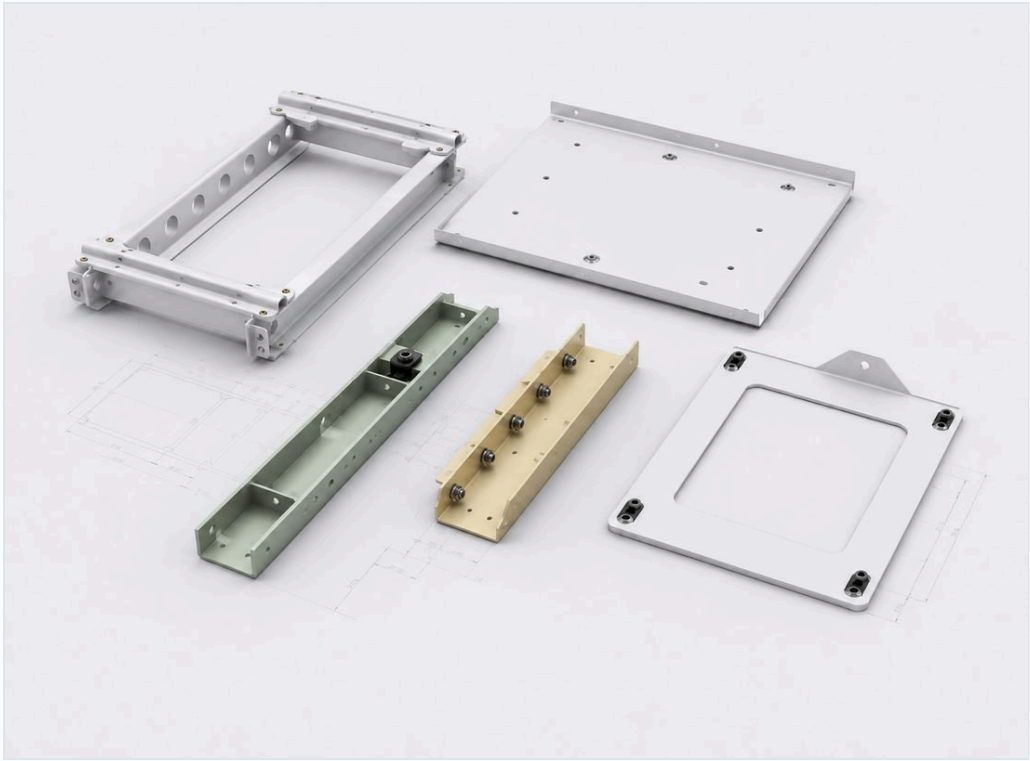

Design and engineering
From requirement to full design and drawings

Cabin monuments and components
Dividers, cabinets, stowage units and other

Complex assemblies
Mixed materials, methods and integrated assembly

Structural parts
Milled or sheet-metal brackets and mounts

Harness assembly and wiring kits
Harnesses for IFE, charging and comms systems

Aftermarket parts & kitting
Complete retrofit kits

Capabilities

PRODUCTION APPROVAL EASA Part 21G · LT.21G.0005 — interior and exterior metallic and non-metallic parts (C2) and appliances (C1).

DESIGN AND ENGINEERING

- 01

Mechanical design and drawings
Concepts, 3D models and production-ready drawing sets
- 02

Analysis
Structural, material, functional analyses
- 03

Test planning and testing
Compilation of test plans, test rig design, test execution
- 04

Manufacturability optimisation
Design refined with production to cut cost and lead time
- 05

Prototyping
3D printed, silicone moulded, milled and bonded prototypes

MANUFACTURING

- 01

Sheet metal components
Various sheet metal foldings and plates
- 02

Composite panel structures
Panel structures and bonded assemblies
- 03

Milled components
CNC milled components
- 04

Wiring and harness assembly
Cable routing, crimping and harness build to drawing
- 05

Treatment/finishing
Chemical conversion, anodising, laminate, brushing, painting
- 06

Assembly, inspection, kitting
Final assembly, quality inspection, kitting, release

HOW WE WORK WITH YOU

Project visibility & communication

01 Early visibility on issues

Potential deviations are communicated early, together with proposed corrective actions and next steps.

02 Direct access to decision-makers

Commercial and technical leadership remain directly accessible throughout the project.

03 Defined communication rhythm

Clear, regular status updates keep you informed on progress, risks and active work packages.

You always know where things stand.

**CLEAR COMMUNICATION. EARLY ESCALATION.
NO SURPRISES.**

SELECTED WORK

Example projects

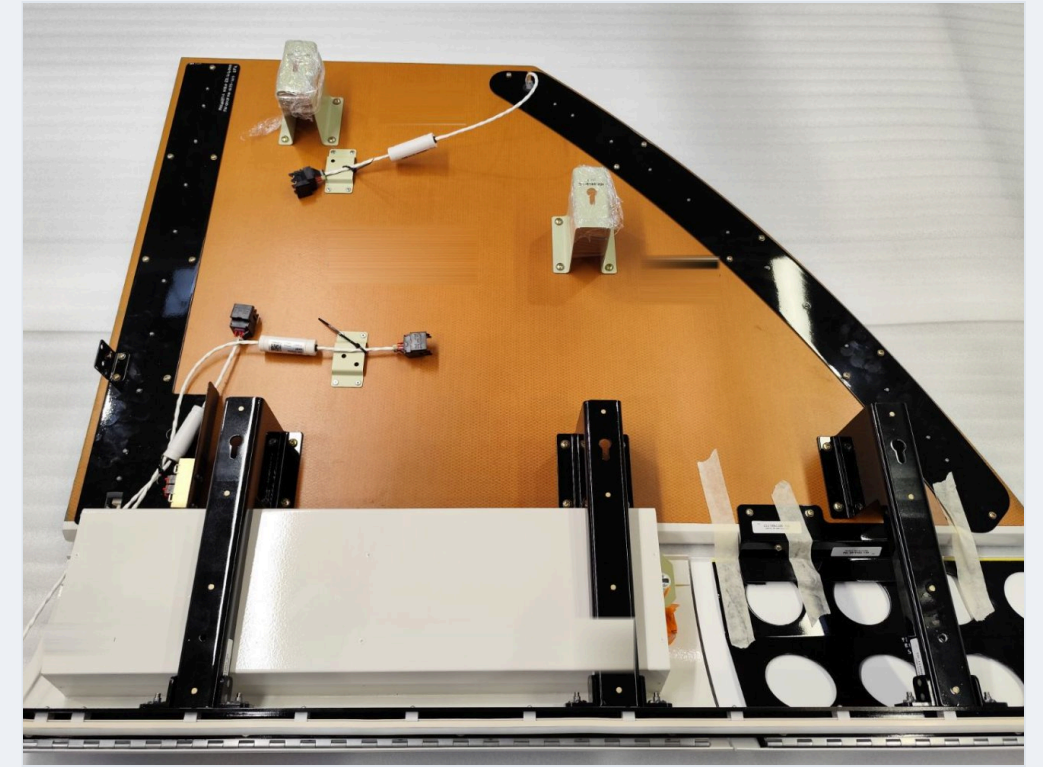

Cabin wardrobes

Boeing 737 business class

Emergency equipment cabinet

Airbus A350, lockable by cabin crew

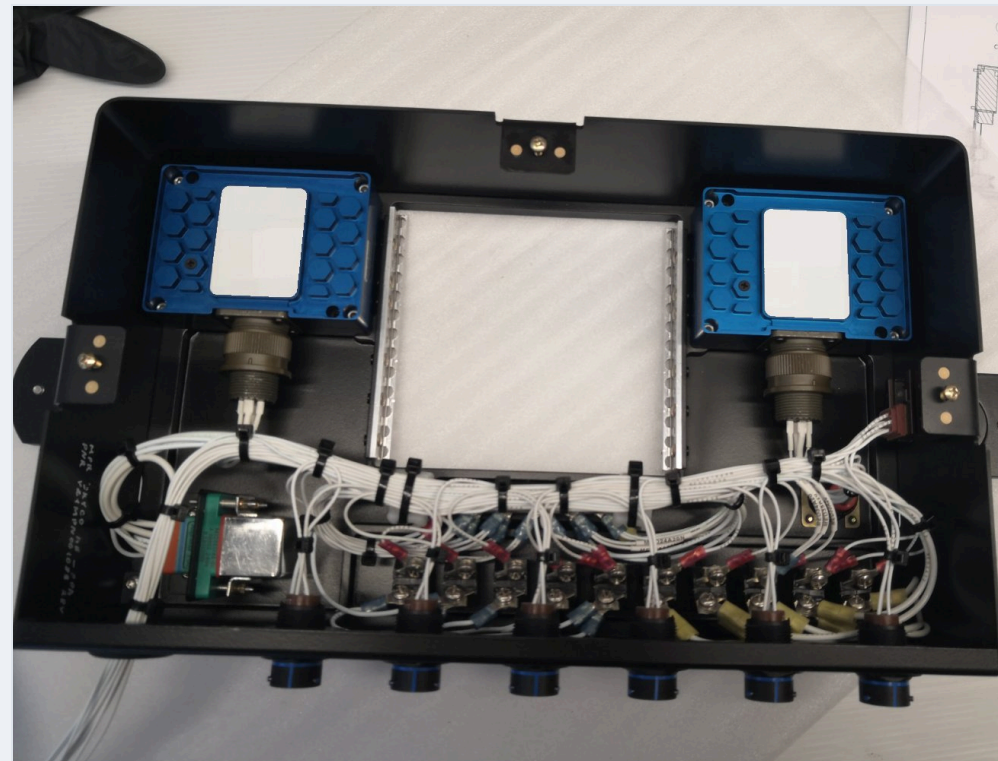

Lighted mirror panel

Boeing 767 lavatory refurbishment

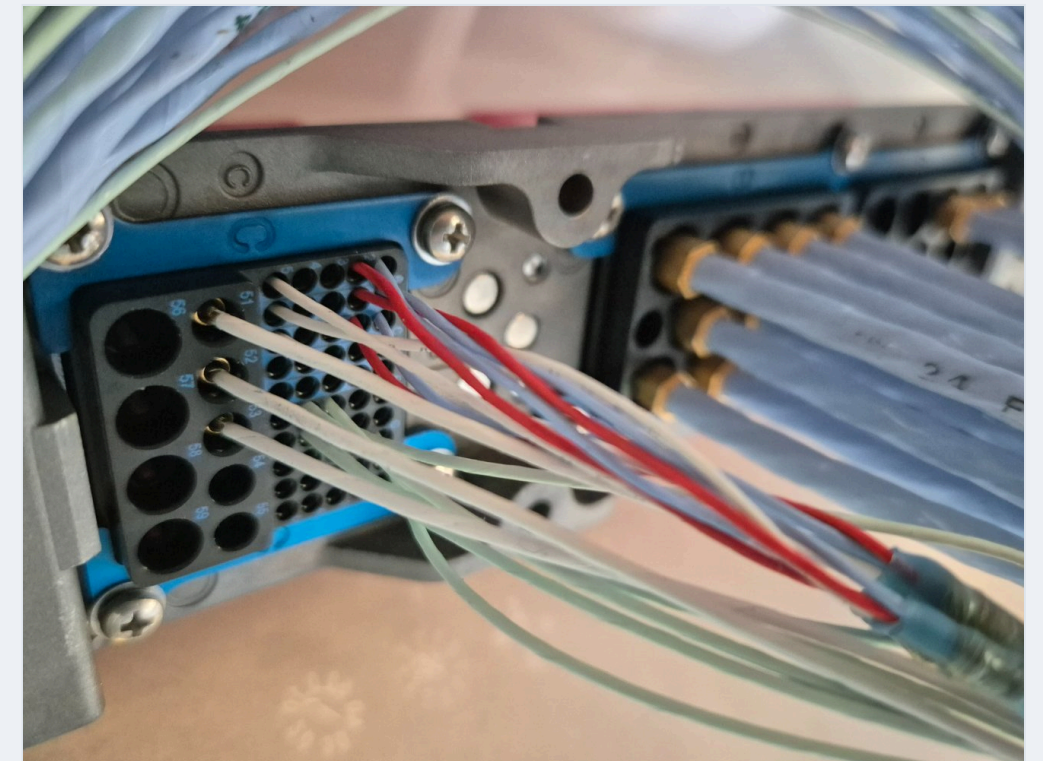

Mounting brackets

Special mission AW139 rotorcraft

Converter assembly

Special mission AW139 rotorcraft

Harness assemblies

SATCOM installation kits

KAUNAS, LITHUANIA

Our facilities

Located in the Kaunas Free Economic Zone, minutes from Kaunas International Airport (KUN).

SITE		SHOPS ON SITE
TOTAL AREA	600 m ²	01 Paint booth
PRODUCTION/STORAGE	430 m ²	02 Thermo chamber
OFFICE SPACE	210 m ²	03 Composite workshop
SHOP FLOOR HEIGHT	6.5 m	04 Machining shop
ENERGY CLASS	A+	05 Electrical shop
ELECTRICITY	100% own solar	06 Abrasive finishing
		07 Prototyping workshop

THE PEOPLE

Meet our team

United by a passion for aviation and built on integrity, transparent communication and accountability.

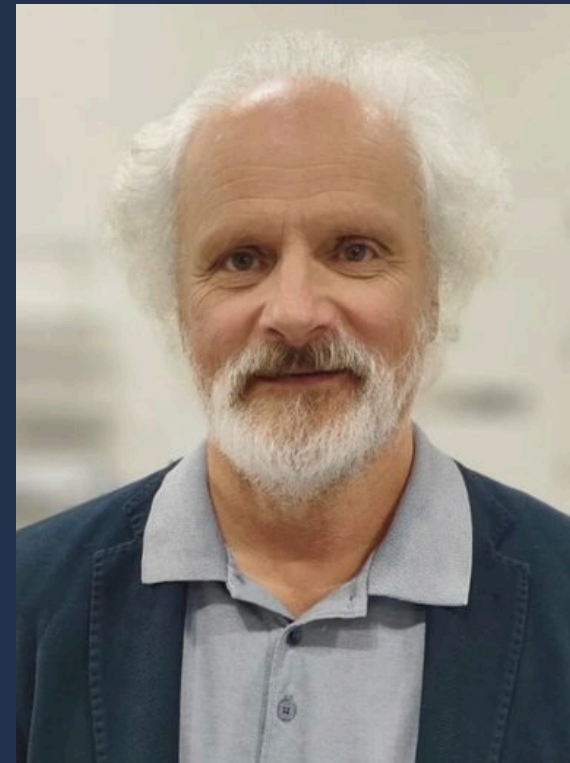

Gytis Leonavičius
FOUNDER, CEO

15+ years in the EASA Part 21 environment — technical and managerial roles, mechanical design for commercial airlines.

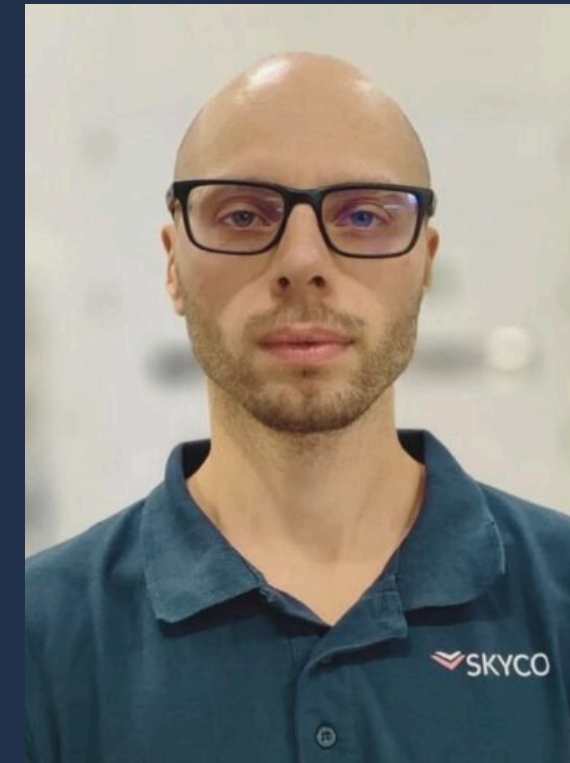

Linas Leonavičius
TECHNICAL DIRECTOR

10+ years in the EASA Part 21 environment — technical and compliance verification positions.

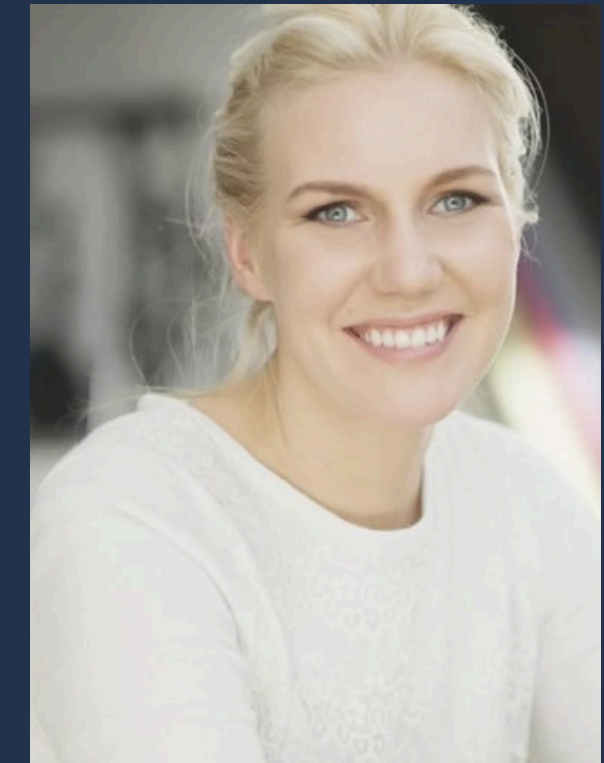

Kęstutis Leonavičius
QUALITY MANAGER

30+ years in aviation — technical manager, aircraft designer, NAA senior specialist and lecturer.

Andrius Abromavičius
PRODUCTION MANAGER

10+ years in aviation design and production, including sailplane systems development.

Aušra Prasauskaitė
COMMERCIAL DIRECTOR

15+ years in marketing, sales and business development; communication lecturer.
